

Cat.6 UTP Plug Termination Instruction

■ Install the boot first.

■ Strip 30mm of cable jacket.

■ Separate 4 pairs.

■ Cut wires separator to the root.

■ Untwist 4 pairs.

■ Insert blue-pair 4&5 to "I"-shape organizer tunnel.
 Note: 1. If blue-pair 4&5 be parallel, insert to organizer directly.
 2. If blue-pair 4&5 be cross, twist with force insert parallel to organizer.
 3. Organizer top-bottom direction is opposite in both ends.

■ lay green-pair 3&6 direction to "Y"-shape organizer slot, twist green wires at least 1/2 to 1 turn.

■ Insert pair 1&2, 7&8 at least 1/2 to 1 turn inside the organizer slots.

■ Comb the wires and cut from top in 30 degree.

■ Thread loadbar.

■ Note2: Pair 3&6, 1&2, 7&8 must be twisted at least 1/2 - 1 turn pair 4-5 must be parallel.

■ Note3: Wired-organizers has two directions for both ends. ■ Fasten boot into plug first then crimp and terminate the wires.
